Dear Editor,

please find enclosed a revised version of our manuscript entitled “Anomalous weak values in a generalized Mach–Zehnder interferometer extracted directly from intensity measurements” that has been submitted to *npj Quantum Information*, with reference c7c5123f-c4f1-4e73-af24-0bc32038eaab.

We would like to thank you and the Reviewers for the time invested in this work and the valuable comments, which contributed to the improvement of the manuscript. We provide a point-by-point response to the Reviewers’ comments and describe the corresponding changes made to the manuscript. Together with the revised manuscript, we provide a version with tracked changes. The edited or added parts are highlighted in a blue font, while the deleted parts are crossed out. During the revision, some small changes in form or grammar have been implemented. For completeness, they are also included in the tracked version.

As requested, we provide the software information related to Figure 3. The figure is produced using “Rhino” Version 7 (7.24.22308.15002, 2022-11-04), licensed to the co-author Stephan Sponar (Serial Number: 6-1700-0103-1-86943-12123).

We hope that the revised manuscript is acceptable for publication in *npj Quantum Information*. Please do not hesitate to contact us if any further information is required.

Best Regards,

Ismaele Vincent Masiello*, Hartmut Lemmel, Andreas Dvorak, Stephan Sponar, and Yuji Hasegawa
